# Introduction

Choosing an LMS that optimally supports your learning organization's needs (and budget!) can be a tricky, time-consuming process. That's why we developed this LMS Buyer's Kit.

With everything from LMS rankings and case studies to an LMS RFP template and selection guide, it puts you on the fast track to choosing the best LMS software for your company.

Let's get started...

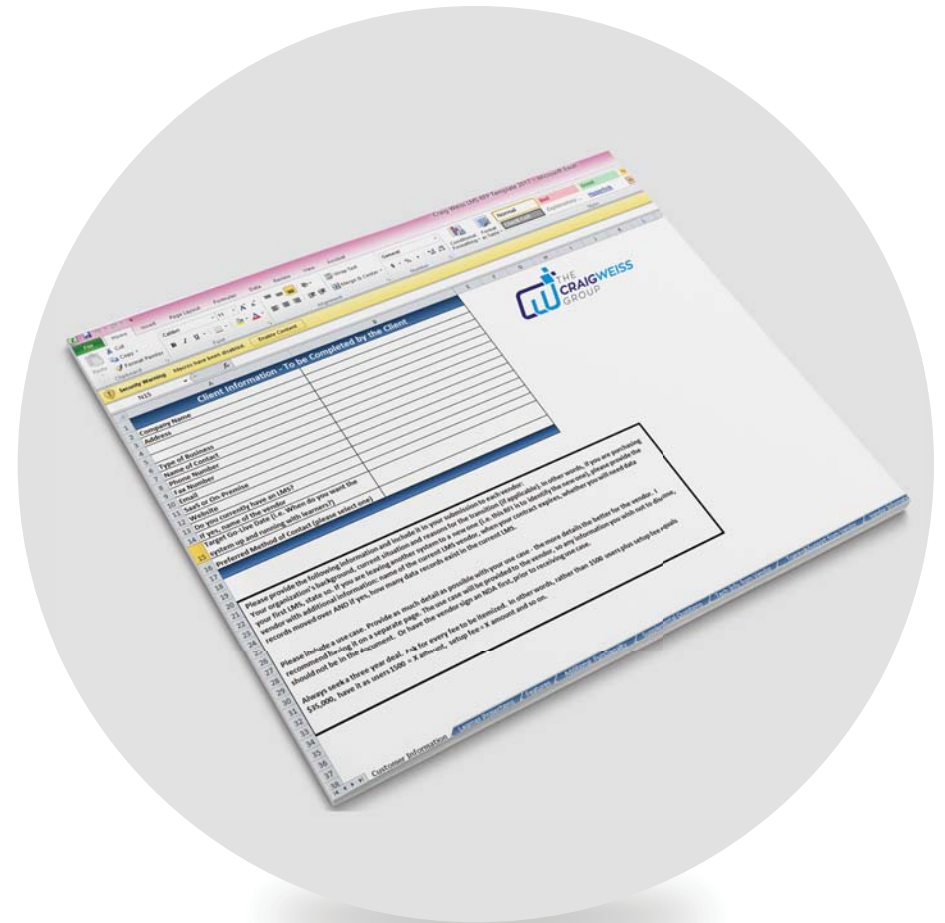

# The Ultimate LMS RFP Template

If you're looking for a way to shorten your LMS search, but still find the best learning technology for your company, download this template.

FACT: Most of the LMS RFP templates online are placed by LMS vendors to direct you to their learning system. That's why Craig Weiss created a true, vendor-neutral LMS RFP guide that will:

- Save you time
- Simplify your search
- Get top results

[Download Template](#)

# Craig Weiss' Top 50 LMS Rankings

Compiled by one of the most influential people in eLearning, Craig Weiss, this comprehensive report details what's hot today and what will be the "next big thing" for the LMS industry, plus:

- The top 50 LMSs with 34 product reviews
- Profiles for the top LMS vendors with implementation times, pricing and everything in between

# The Future State of the LMS

How does your learning management system stack up? Read this research report to know what next-gen features most LMS buyers want, and whether today's LMSs deliver.

Some findings include...

- Only 40% are happy with their existing LMS' advanced learning capabilities
- The top three next-gen LMS features are flexibility, integration and reporting
- Social and mobile learning are also trending among key learning needs

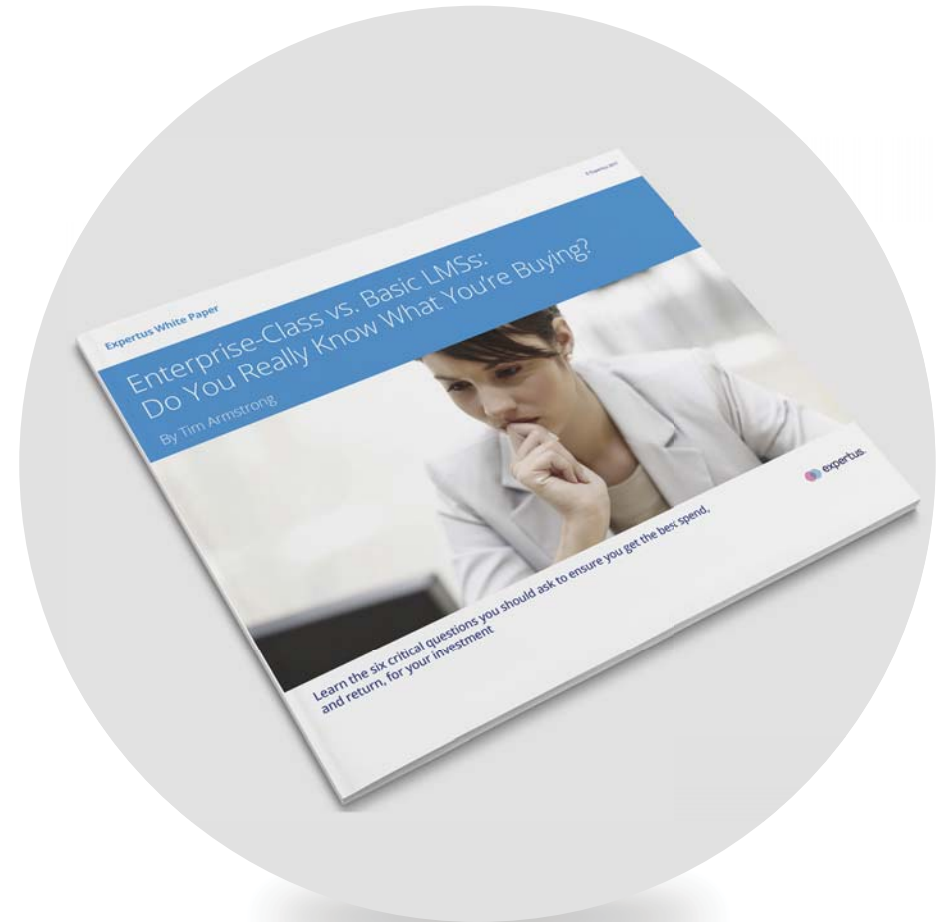

[Get Report](#)

# Enterprise-Class vs. Basic LMSs

Do you know what you're really buying? When weighing your LMS options, you should know what the true costs and end value will be before making your investment.

Read this white paper to learn the six critical questions you must ask, including:

- Can the system scale? What about integration?
- Can you afford a poor user experience?
- How important is system security?

## Avoiding LMS Admin Headaches & LMS Implementation Tips

If you'd like to jumpstart your LMS search, read these blogs with helpful tips on how to avoid common admin headaches, the top six signs that you've outgrown your LMS and how to best implement your new learning tech investment.

### How to Avoid the Most Common, and Frustrating, LMS Admin Headaches

*Is your company at a crossroads? You have a legacy learning platform that serves your employees well. However, for your LMS to stay relevant, you've had to add on more and more complexity. And this is creating a nightmare for your LMS Admins! I can help.*

## Top 6 Signs that Your Tech Company Has Outgrown Its LMS

*Are your customers starting to complain about using your LMS (it's slow, has iffy eCommerce, is hard to navigate, etc.)? Maybe some have even stopped buying your training altogether? This is, by far, the biggest sign that you've outgrown your LMS.*

[Read Blog](#)

## 6 Surefire Tips for a Successful LMS Implementation

*While there's a lot of time and money spent on finding the best LMS for an organization, companies often skimp on their implementation due diligence. This is a huge mistake! Even if you find the perfect LMS, if it's not properly implemented, it won't deliver. You could also end up with a very costly implementation that drags on for months.*

# Conclusion

Looking for a new LMS can become a long, costly process if left unchecked. While doing your homework is critical for finding the best LMS solution for your organization, making the journey as fast and efficient as possible is key.

Hopefully the resources here will help expedite your journey, and help you get the most ROI from your future LMS investment.
