

Experience the Future of the LMS Platform

Meet the ONE

LMS Innovation for Learning Organization Success

ExpertusONE has “one” in its name for many reasons. It’s the #1 enterprise LMS, 5 years running. It was first to offer a true mobile app and native Learning Record Store. It also continues to push learning technology innovation with tools like Dynamic Shareable Links and Embeddable Widgets.

How will ExpertusONE impact your business? Meet its award-winning features and functionalities here.

Mobile

Fully featured, on-the-go learning

- Learn on or offline via native, award-winning Apple iOS and Android apps
- Same LMS experience: watch videos, take surveys, access training plans, buy and launch courses
- Actionable dashboards, tools and analytics for learners, managers, admins and instructors

Reporting & Analytics

Sophisticated LMS reporting, made simple

- Visual reporting for real-time snapshot of learner status, progress and engagement
- Simple report generation (mobile and desktop) for managers, admins and learners
- Replaces costly third-party reporting tools

Learning Record Store (LRS)

Complete LRS integration and reporting

- First LMS with built-in LRS; handles current and future analytic needs, including MP4, Vimeo and YouTube videos
- Store, collate and compare xAPI data to elevate training program and LMS effectiveness
- On-demand access to real-time analytics from the desktop or mobile

Video

Play YouTube, MP4 and Vimeo videos

- Native video content creator and player with bookmarking and tracking capabilities
- Easy workflows—create, add and launch video courses in minutes
- Perfect forum for informal training and micro-learning

Invisible Learning

Innovation that drives learning to learners

- Embeddable Widgets—places the training catalog where learners spend the most time: websites, social media, emails and SharePoint
- Dynamic Shareable Links—puts content search links anywhere they’re needed (software apps, websites, pdfs) for meaningful, just-in-time training
- Next-level Segmentation—sophisticated, yet easy to manage grouping pushes contextualized experience to learners and admins in real-time

Salesforce

Seamless LMS and Salesforce integration

- Raise sales team engagement with convenient, direct LMS access within the Salesforce UI
- Create more up-selling opportunities by pushing Salesforce training data to the LMS
- Use Salesforce’s native reporting engine to integrate essential learning data for more meaningful sales reports

API Integration

Connect your LMS and enterprise software

- Extend your LMS’ reach with the industry’s broadest REST API library
- 140+ APIs seamlessly connect HRISs, ERPs, CRMs and more

Gamification

Motivate learning behavior and drive change

- Simple to use gamification tool that rewards selected learning behavior by department or enterprise-wide
- Easy way to promote knowledge sharing and top corporate programs or goals
- Built-in context with other ExpertusONE social tools, such as sharing, ratings and discussion forums

More LMS Innovation. More LMS Value.

As the commercial grade LMS, ExpertusONE has the flexibility to handle your unique scalability and growth demands. With the innovative, modern design to totally engage your multiple, global learning audiences.

It is this enterprise-class design that can transform your training organization from a cost center to a business-driver, and help your learning professionals provide more value for their organization.

See how you can use our learning technology innovation for superior training engagement, and outcomes!
